I have graduated highschool with 4 gpa and a lot of good memories.   Addis Ababa, Ethiopia

Skills

Technical skills
- *Programming Languages:* Python, Java and Javascript.
- *Web development* : Skilled in creating responsive websites using HTML, CSS and Javascript.
- *Tools & Technologies :* Proficient with Git.

Soft skills
- Strong team work and collaberation abilities.
- Good communication skill.
- problem solving and critical thinking skill.
- organization and Time managment.
- Team leadership.

Courses

Front end web development, *The Odin project*
- online course on web development skills using HTML, CSS, and JavaScript through project-based learning. By building real-world projects, learners gain hands-on experience in creating responsive and interactive websites.

Introduction to python, *Kibur college*   Addis Ababa, Ethiopia
- It gave me a strong foundation in computer science principles, python, algorithms, and problem-solving skills through hands-on projects and real-world applications.

Foundation on user interface design, *udemy*
- online course on the principles of UI design, user-centered design processes, and creating intuitive, visually appealing interfaces using industry-standard tools and techniques.

Professional Experience

Sales representative, *Golden sales company*   03/2023 – 09/2024
- I developed strong problem-solving, communication, and customer engagement   Addis Ababa, Ethiopia
  skills, which are valuable in gathering user requirements, collaborating with cross-functional teams, and delivering user-centered software solutions

Catalogue, *Abrehot Library*   12/2023 – 03/2023
- I developed and maintained software solutions for managing and searching   Addis Ababa, Ethiopia
  library resources, optimized database performance, and integrated external systems to enhance user experience and streamline cataloging processes.

Academic projects

- Working on academic group projects as a leader has provided me with valuable professional experience in team coordination, task delegation, and problem-solving.

Tutor and Mentor for programming fundamentals   Addis Ababa, Ethiopia

- I provided academic support, guided problem-solving, and helped develop study strategies to ensure academic success. My experience included creating tailored learning plans, offering one-on-one sessions, and fostering a positive, collaborative learning environment.

Projects

Online blood banking system website   10/2024 – present

- Developed a streamline task organization, project tracking, and team collaboration with an intuitive interface and efficient workflow management using node.js

Note taking app   02/2024 – 08/2024

- Built a note-taking app using HTML, CSS, and Java, allowing users to create, organize, and manage notes with features such as text formatting, search functionality, and easy navigation for improved productivity.

To do list app   05/2024 – 02/2024

Certificates

- United Nation Economic for Africa Certificate
- kibur college python course certificate

- Volunteer team leader certificate from St Giyorgis church

- Girls can code AU certificate
